

Grants - Finance User Guide

A guide to the Grants module of the Sesigo Data Portal, written for finance and accounting staff. The module is a simple ledger for accounting for grant funding: what was **awarded** to each organisation, what has been **paid out** to them, and what they have **spent** - so you can see, at any time, how much is left and whether anyone is over- or under-spending. Coordinators' figures are **consolidated** automatically from their sub-grantees.

The terms we use

- **Award (grant):** the total funding committed to an organisation for a project.
 - **Budget line:** the award broken down by expense category (e.g. Personnel, Activities, Travel).
 - **Disbursement:** money actually **paid to** the organisation - a tranche or instalment. Recorded by date and amount.
 - **Expenditure:** money the organisation has **spent**, recorded by date and category. (Attach a supporting document where required.)
 - **Remaining balance:** Award ? Expenditure - funds not yet spent.
 - **Cash on hand:** Disbursed ? Spent - money received but not yet spent.
 - **Burn rate:** Expenditure ÷ Award, shown as a percentage. Over 100% means the organisation has spent more than it was awarded (overspent).
 - **Coordinator consolidation (roll-up):** a coordinator's figures are its own award and spending **plus** all of its sub-grantees' - much like a head office consolidating its branches' accounts.
 - **Financial year & quarters:** the year runs **April to March**. Q1 = Apr-Jun, Q2 = Jul-Sep, Q3 = Oct-Dec, Q4 = Jan-Mar.
-

Who can do what

- **Finance officer** - can create and edit awards, and record disbursements, expenditure and budget lines.
 - **Coordinator** - can **view** its own and its sub-grantees' grants (read-only); cannot change anything.
 - **Administrator** - full access.
 - **Everyone else** - no access. The module is hidden until access is granted, so financial data is never shown to staff who should not see it.
-

Recording the money (day to day)

1. **Open Grants** from the left-hand menu.
2. **Record an award** - click **New grant**, choose the organisation and project, then enter the amount, currency, a reference/title, the start and end dates and the status (draft / active / suspended / closed).
3. **Enter the budget** (optional) - open the grant and add **budget lines** by category, so the award is split into planned amounts.
4. **Record disbursements** - each time money is paid to the organisation, add a

disbursement (date, amount, tranche number).

5. Record expenditure - as the organisation spends, add expenditure entries (date, category, amount, and a supporting document if needed).

6. Correct or remove - use **Edit grant** to fix details, or **Delete grant** to remove an award and its records.

*Tip: always enter the ****correct date**** on an expenditure - the quarterly report places each amount into a financial quarter based on that date.*

Reading the reports

Summary by organisation. For every organisation: ****Awarded, Disbursed, Spent, Remaining and Burn %****, with a grand total at the foot. Spending is colour-coded:

- green = within budget,
- amber = near the limit (90-100%),
- red = over budget (above 100%).

Quarterly expenditure (by coordinator). Expenditure for each organisation split across the four financial quarters, with each coordinator shown as a ****consolidated total**** (its own plus its sub-grantees), and a grand total. Choose the financial year from the selector at the top.

Export. The **Export CSV** button downloads the summary to open in Excel.

A worked example

Reading the summary for one coordinator and its two sub-grantees:

Organisation	Awarded	Disbursed	Spent	Remaining	Burn

Coordinator A	1,000,000	900,000	950,000	50,000	95% (amber)
MBGE	600,000	600,000	660,000	-60,000	110% (red, overspent)
BONELA	400,000	300,000	290,000	110,000	73% (green)

CONSOLIDATED	2,000,000	1,800,000	1,900,000	100,000	95%

- **Remaining** is Award - Spent (MBGE is negative because it overspent).
- **Burn** is Spent ÷ Award; MBGE at 110% has spent more than its award.
- The **Consolidated** line is the coordinator's own figures plus both sub-grantees.

The quarterly view then shows the same spending split by quarter, e.g.:

Organisation	Awarded	Q1	Q2	Q3	Q4	FY total

Coordinator A	1,000,000	180,000	40,000	30,000	0	250,000
MBGE	600,000	120,000	0	30,000	0	150,000
BONELA	400,000	60,000	40,000	0	0	100,000

Coming soon: cost-per-result (value for money)

A future addition will show **cost per result** - money spent divided by results

delivered (for example, cost per person reached) - so you can compare how efficiently organisations turn funding into outputs. This needs the programme to **nominate which result to measure against**; once chosen, it will appear on the coordinator consolidation. Until then it is intentionally left blank, so no misleading figure is ever shown.

Getting access / support

To be given access, ask an administrator to enable the **Grants** module for your account - **Finance** (full) or **Coordinator** (view only). For help, use the in-app Support / help-desk.
