

# BONASO Data Portal User Manual

## 1. Purpose

This manual explains how to use the BONASO Data Portal to manage organizations, projects, indicators, respondents, aggregates, reports, dashboards, and flags.

The portal supports:

- ? Data collection and tracking
- ? Project and indicator management
- ? Organization-based target setting
- ? Respondent and interaction management
- ? Analysis, reports, and dashboards
- ? Offline-first usage for supported workflows

## 2. Getting Started

### Login

1. Open the portal in your browser.
2. Enter your username or email and password.
3. Select Sign In.

If login fails:

- ? Check your username and password.
- ? Confirm the backend server is running.
- ? Ask an administrator to verify your account permissions.

### Main Navigation

The left sidebar gives access to:

- ? Dashboard
- ? Organizations
- ? Users
- ? Projects
- ? Indicators
- ? Respondents
- ? Aggregates
- ? Events
- ? Social Media
- ? Uploads
- ? Analysis

? Flags

? Settings

### **3. Dashboard**

Use the dashboard to see a quick summary of activity across the system.

Typical dashboard information includes:

? Active projects

? Recent activity

? Indicator and respondent summaries

? Alerts and data quality issues

### **4. Organizations**

Use Organizations to view and manage implementing organizations.

You can:

? Open an organization record

? View related users and linked work

? Understand parent-child organization structure

Organization records are important because targets and some data access are scoped by organization.

### **5. Projects**

Use Projects to manage implementation work, timelines, and participating organizations.

#### **Project List**

From the project list, you can:

? View all projects

? Search and filter projects

? Open a project detail page

? Create or edit a project

#### **Project Detail**

The project detail page shows:

? Project status

? Timeline

? Linked organizations

? Project progress

? Tasks

? Deadlines

? Organization targets

## **Organization Targets in Projects**

Projects now show a Targets tab.

This tab groups targets by organization and shows:

? Indicator

? Q1 target

? Q2 target

? Q3 target

? Q4 target

? Annual total

? Progress

This is useful when:

? the same indicator is shared by more than one organization

? each organization has its own expected target

## **6. Indicators**

Use Indicators to define what the system tracks.

Each indicator includes:

? Name

? Code

? Description

? Category

? Type

? Unit

? Disaggregation setup

? Active/inactive state

### **Indicator Detail**

The indicator detail page shows:

? Indicator metadata

? Quarterly target records

### **Organization-Specific Targets**

Targets are now managed on the indicator pages per:

? Project

? Organization

? Indicator

This means one indicator can be used by multiple organizations, while each organization keeps its own target values.

## **Adding or Editing Targets**

Open an indicator, then use the Organization Quarterly Targets section.

For each target record you must choose:

? Project

? Organization

? Q1 target

? Q2 target

? Q3 target

? Q4 target

? Optional baseline value

## **Financial Year**

Quarter targets follow the BONASO financial year:

? Q1: 1 April ? 30 June

? Q2: 1 July ? 30 September

? Q3: 1 October ? 31 December

? Q4: 1 January ? 31 March of the following year

## **7. Respondents**

Use Respondents to manage individual beneficiary or client records.

You can:

? View respondent details

? Edit respondent records

? Review demographics

? Create interactions

? Flag records for follow-up or quality review

## **Respondent Detail Page**

The respondent view is structured to match the older BONASO workflow more closely.

You can review:

? Respondent details

? Key population status

- ? Disability status
- ? HIV status
- ? Pregnancy information
- ? Flags
- ? Additional information

## **8. Interactions**

Use Respondents > Interactions to track services, follow-ups, or other engagements linked to a respondent.

You can:

- ? Create a new interaction
- ? Link an interaction to an assessment, project, or event
- ? Review historical interactions

## **9. Aggregates**

Use Aggregates when data is captured as totals instead of individual respondents.

This section supports:

- ? Aggregate data entry
- ? Disaggregated matrix views
- ? Review by organization
- ? Import/export workflows

## **10. Events**

Use Events to manage activities such as trainings, outreach sessions, and community engagements.

You can:

- ? Create events
- ? Track event phases
- ? Add participants
- ? Link indicators where needed

## **11. Social Media**

Use Social Media to manage tracked social posts and related activity where configured.

## **12. Uploads**

Use Uploads to submit files for import into the system.

You can:

- ? Upload files
- ? Review import jobs
- ? Check status of processing

## 13. Analysis

Use Analysis for saved dashboards, chart review, and reporting workflows.

The current analysis workspace behaves more like the older BONASO analytics flow.

### Dashboards

In Analysis > Dashboards you can:

- ? Create a new dashboard
- ? Load an existing dashboard from the sidebar
- ? Select indicators
- ? Filter by organization
- ? Filter by project
- ? Switch chart types
- ? Filter by fiscal quarter or custom dates
- ? Save, update, or delete dashboards
- ? Download charts as SVG or CSV

### Reports

In Analysis > Reports you can:

- ? Create reports
- ? Filter reports
- ? View generated reports
- ? Download output files

## 14. Flags

Use Flags to manage data quality and follow-up issues.

Flags help identify:

- ? Data quality problems
- ? Records requiring review
- ? Follow-up needs
- ? Urgent items

You can:

- ? View all flags

- ? Filter by status or priority
- ? Review affected records
- ? Mark a flag as resolved

## 15. Offline Use

The portal supports offline-first behavior for some workflows.

### What Works Offline

- ? Previously visited pages
- ? Cached static assets
- ? Cached API GET responses
- ? Queued create/update/delete actions for later sync

### What Does Not Work Offline

- ? First-time data loads not already cached
- ? Login and token refresh
- ? Some server-dependent actions

### Recommended Offline Workflow

1. Open the portal while online.
2. Visit the pages you expect to use.
3. Continue working if connection drops.
4. Reconnect to allow queued changes to sync.

## 16. Common Workflows

### Create an Organization Target

1. Open Indicators.
2. Select an indicator.
3. Open the target section.
4. Click Add Organization Target.
5. Select the project.
6. Select the organization within that project.
7. Enter Q1 to Q4 values.
8. Save.

### Review Targets for a Project

1. Open Projects.

2. Select a project.
3. Open the Targets tab.
4. Review grouped organization target tables.

### **Add a Respondent Interaction**

1. Open Respondents.
2. Open a respondent record.
3. Select New Interaction.
4. Enter the interaction details.
5. Save.

### **Create a Dashboard**

1. Open Analysis.
2. Select New Dashboard.
3. Enter a dashboard name.
4. Choose indicators.
5. Choose organization or project filters if needed.
6. Select a fiscal quarter or custom dates.
7. Save the dashboard.

## **17. Troubleshooting**

### **I cannot see some records**

Possible reasons:

- ? your role does not have permission
- ? the records belong to another organization
- ? filters are hiding the data

### **I cannot save targets**

Check that:

- ? a project is selected
- ? an organization is selected
- ? all four quarters have values
- ? the organization belongs to that project

### **Progress looks different from one organization to another**

That is expected if:

- ? the organizations have different target values
- ? the indicator is shared but each organization has separate targets

## **A page is not loading**

Check:

- ? internet connection
- ? backend server availability
- ? session expiration

## **18. Good Practice**

- ? Use clear project and indicator codes.
- ? Set targets at the organization level where indicators are shared.
- ? Review flags regularly.
- ? Confirm fiscal quarter before entering targets.
- ? Use project and analysis pages to review target distribution across organizations.
